PARTS LIST

Left fog light

Right fog light

Fog light harness

Switch harness

Switch

Relay

6 Tapping-screws, 5 x 16 mm

17 Wire ties

Fuse (20A)

TOOLS AND SUPPLIES REQUIRED

Phillips screwdriver

Flat-tip screwdriver

Diagonal cutters

Ratchet

10 mm Socket

10 mm Combination wrench

Blanket

Illustration of the Fog Lights Installed on the Vehicle

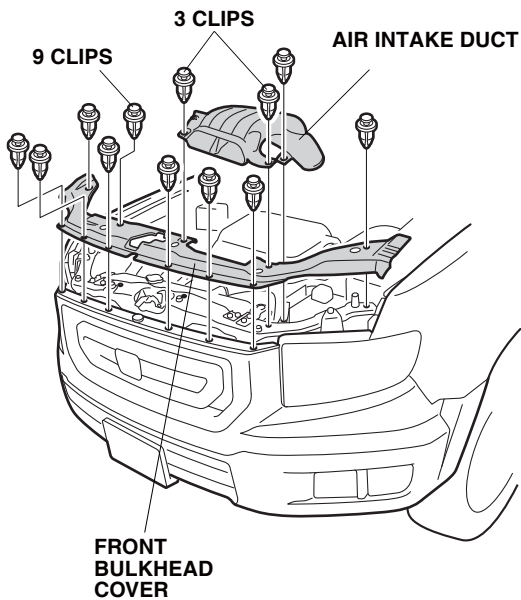

INSTALLATION

Customer Information: The information in this installation instruction is intended for use only by skilled technicians who have the proper tools, equipment, and training to correctly and safely add equipment to your vehicle. These procedures should not be attempted by “do-it-yourselfers.”

1. Make sure you have the anti-theft code for the audio and navigation system (if equipped).
2. Disconnect the negative cable from the battery.

Removing the vehicle parts

3. Remove the air intake duct and the front bulkhead cover (twelve clips).

4. Remove the front bumper (one clip, four bolts, two short step bolts and four self-tapping screws). Have an assistant help you when removing the front bumper. Place the front bumper on a blanket after removal.

5. Remove the clip that fastens the washer reservoir tank.

Routing the Fog Light Harness

6. Locate the vehicle 1-pin connector, and remove the black tape to release the connector.

7. Plug the fog light harness 1-pin connector into the vehicle 1-pin connector.

8. Route the fog light harness ground terminal to the underside of the vehicle.

9. Secure the fog light harness ground terminal to the vehicle frame with one ground bolt.

10. Route the fog light harness 2-pin connector (shorter side) as shown, and align the green-taped part of the fog light harness with the vehicle clip.

11. Secure the fog light harness to the vehicle harness with one wire tie.

12. Route the fog light harness 2-pin connector (longer section of the harness) along the vehicle harness to the left side of the vehicle as shown.

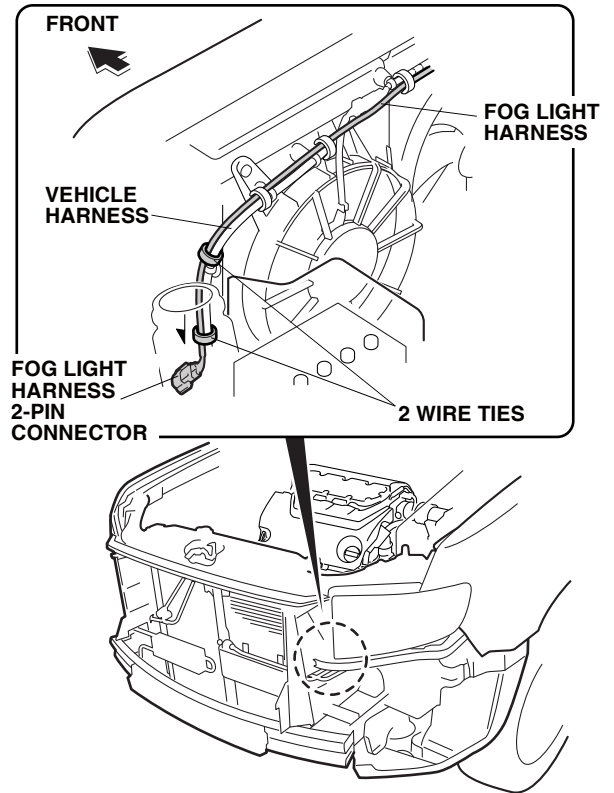

13. Secure the fog light harness to the vehicle harness with four wire ties.

- Route the fog light harness 2-pin connector (longer section of the harness) along the vehicle harness to left side of the vehicle as shown.

- Secure the fog light harness to the vehicle harness with five wire ties.

- Route the fog light harness 2-pin connector (longer section of the harness) along the vehicle harness to left side of the vehicle as shown.

- Secure the fog light harness to the vehicle harness with two wire ties.

- Route the fog light harness 2-pin connector (longer section of the harness) under the left headlight as shown.

- Secure the fog light harness to the vehicle harness with two wire ties.

- Align the green-taped part of the fog light harness with the vehicle clip, and secure the fog light harness to the vehicle harness with one wire tie.

Installing the Fog Lights

- Remove the left cover from the front bumper (three retaining tabs).

22. Insert the left fog light to the front bumper with three self-tapping screws.

23. Repeat steps 21 and 22 on the right side.

24. With the help from an assistant, plug each fog light harness 2-pin connector into the fog lights.

25. Reinstall the front bumper. Have an assistant help you when installing the front bumper.

Installing the Relay and Fuse (20A)

26. Remove the relay block cover (two retaining tabs).

27. Install the relay into the vehicle relay block.

28. Remove the fuse cover (four retaining tabs).

29. Install the fuse (20A) into the fuse case as shown.

Routing the Switch Harness

30. Remove the left dashboard side cover (seven clips).

31. Remove the driver's dashboard lower cover (one self-tapping screw, nine clips, unplug one vehicle connector).

32. Remove the switch lid from the driver's dashboard lower cover, and install the switch to the driver's dashboard lower cover.

33. Unplug the vehicle 3-pin connector from the fuse box. Plug the vehicle 3-pin connector into the switch harness 3-pin connector, and plug the switch harness 3-pin connector into the fuse box connector as shown.

34. Route the switch harness 5-pin and 10-pin connector to the dashboard lower cover opening.

35. Secure the switch harness to the vehicle harness with two wire ties.

36. Plug the vehicle VSA switch 10-pin connector into the switch harness 10-pin connector.

37. Plug the switch harness 5-pin connector (gray) into the fog light switch, and plug the switch harness 10-pin connector (gray) into the vehicle VSA switch.

USE AND CARE

How to Operate Fog Lights

- Turn the headlight switch to the “D” position (headlights on low beam).
- Turn the fog light switch on (indicator is on).
NOTE: The fog light lenses can cloud when the outside temperature is cold; this is normal and should go away in warm weather.
- If the fog lights do not come on, check the fuse and all the connectors, including the ground cable.

Fog Light Aim Adjustment

- Adjust the aiming according to local laws and regulations.
- To adjust, turn the adjustment screw in or out until the correct aim is obtained.

BULB REPLACEMENT

1. Remove two bolts, and pull down the under cover and inner fender.

2. For this procedure, insert your hand inside of the inner fender pulled aside in step 1. Unplug the connector from the fog light, and remove the bulb.

3. Install the new bulb and socket to the fog light.
 - Use only a Honda Genuine halogen light bulb of specified wattage.
Rating: 12V 55W H11 Halogen Light Bulb
P/N33165-S5A-003
 - Do not touch the bulb. Oily or greasy substances on the bulb can shorten its service life due to the heat produced when the bulb is turned on. If the bulb is touched accidentally, wipe it clean with a soft cloth that has been dampened with a denatured alcohol or a mild detergent solution.
 - When installing the new bulb, align the cutout on the fog light with the tab on the new bulb and turn the new bulb in completely. If not properly aligned, the fog light may blind oncoming drivers.

4. Reinstall all removed parts. Check that the wire harnesses are not pinched. Be sure to tighten the clip and bolts securely.
5. Check the operation of the fog light; adjust the aim if necessary.
